

IAU SYMPOSIUM 262
“*Stellar Populations: Planning for the Next Decade*”
Rio de Janeiro, Brazil, August 3-7, 2009

PROGRAM

Monday 03

09:00 - 10:30 Jarle Brinchmann (K)
Challenges in Stellar Population Studies

10:30 - 11:00 COFFEE

Session 1: Physics of Stellar Populations

11:00 - 11:45 Santi Cassisi (K)
Evolutionary models: firm evidence - open questions - future developments

11:45 - 12:00 A. Javier Cenarro
Blue straggler stars rejuvenating the integrated spectra of globular clusters

12:00 - 12:15 Aldo A. R. Valcarce
Study of the He-enrichment in globular clusters

12:15 - 12:30 Dany Vanbeveren
The influence of binaries on the temporal evolution of the stellar populations and of the chemical elements in galaxies

12:30 - 14:00 LUNCH

14:00 - 14:30 Paola Marigo (I)
TP-AGB stars in population synthesis models

14:30 - 14:45 Onno R. Pols
Carbon-enhanced metal-poor stars and the importance of binary stars in stellar population studies

14:45 - 15:00 Zhanwen Han
Evolution of binary stars and its implications for evolutionary population synthesis

15:00 - 15:15 Rosa Amelia Gonzalez-Lopezlira
Tracers of stellar mass-loss. Optical and IR colors and surface brightness fluctuations

15:30 - 16:00 COFFEE

Session 2: Spectral Evolution Models

16:00 - 16:45 Gustavo Bruzual (K)
Population synthesis: challenges for the next decade

16:45 - 17:00 Alexandre Vazdekis
Canonical and alpha-enhanced MILES-based models

- 17:00 - 17:15 Peter Anders
GALEV feat. binaries and high-resolution spectra
- 17:15 - 17:30 Roberto Cid Fernandes
Testing evolutionary synthesis models: empirical feedback to model makers

Tuesday 04

- 11:00 - 11:30 Claus Leitherer (I)
Spectral evolution models for the next decade
- 11:30 - 11:45 Elisabete da Cunha
A simple model to interpret the ultraviolet, optical and infrared spectral energy distributions of galaxies
- 11:45 - 12:00 Esther Marmol-Queralto
Stellar population study in early-type galaxies: an approach from the K band
- 12:00 - 12:15 Stefano Zibetti
Resolved maps of stellar mass and sed of galaxies from optical/NIR imaging and SPS models
- 12:15 - 12:30 Grazyna Stasinska
Nebular abundances in galaxies

Wednesday 05

Session 3: Milky Way and Local galaxies

- 11:00 - 11:45 Steven Raymond Majewski (K)
The future of stellar population studies in the Milky Way and local group
- 11:45 - 12:00 Sakurako Okamoto
The stellar populations and spatial structures of dark dwarf satellites
- 12:00 - 12:15 Mikako Matsuura
Infrared sources in the galaxies in the local group
- 12:15 - 12:30 Sophia Lianou
Early-type dwarf galaxies in the M81 group
- 12:30 - 14:00 LUNCH
- 14:00 - 14:30 Eline Tolstoy (I)
Dwarf galaxies in the local group
- 14:30 - 14:45 Aaron J. Grocholski
New DEEP HST/ACS photometry of NGC 1569: constraining the evolution of the strongest starburst in the nearby universe
- 14:45 - 15:00 Timothy C. Beers
Metallicity mapping with GRI photometry and the distance to the Virgo overdensity
- 15:00 - 15:15 Sonia Valeria Duffau
The Virgo stellar stream
- 15:15 - 15:30 Antonela Monachesi
The stellar populations of M32: resolving the nearest elliptical with HST ACS/HRC

- 15:30 - 16:00 COFFEE
- 16:00 - 16:15 Rene Alejandro Mendez
Proper motions of local group dwarf galaxies
- 16:15 - 16:30 Mustapha Mouhcine
The outskirts of the Milky Way analogue NGC 891
- 16:30 - 16:45 Paula Coelho
An analysis of the composite stellar population in M32
- 16:45 - 17:00 Martin Bureau
The UV-upturn phenomenon in early-type galaxies: UV-linestrength relations
- 17:00 - 17:15 Sukyoung Ken Yi
The current status on the UV upturn: observation and theory
- 17:15 - 17:30 Kim Venn
Stellar metallicity and kinematics in the gas-rich dwarf galaxy WLM

Thursday 06

Session 4: Early- and Late-type galaxies

- 09:00 - 09:45 Ivo Labbe (K)
Dissecting the formation histories of galaxies with stellar populations models
- 09:45 - 10:00 Rogerio Riffel
Probing the stellar population of seyfert galaxies: a near infrared view
- 10:00 - 10:15 Sugata Kaviraj
The evolution of early-type galaxies over the last 8 billion years: insights from the rest-frame ultraviolet
- 10:15 - 10:30 Lauren A. MacArthur
Stellar population and kinematic profiles in spiral bulges and disks
- 10:30 - 11:00 COFFEE
- 11:00 - 11:30 David C. Koo (I)
DEEP, AEGIS, and CATS: pathfinding surveys to the next generation of distant galaxy stellar population research
- 11:30 - 11:45 Ignacio Trujillo
Weak velocity dispersion evolution of spheroid-like massive galaxies since $z \sim 2$
- 11:45 - 12:00 Patricia Sanchez-Blazquez
The star formation history and chemical evolution of disk galaxies
- 12:00 - 12:15 Ricardo P. Schiavon
The metallicities and abundance patterns of globular clusters in M31
- 12:15 - 12:30 adjourn
- 12:30 - 14:00 LUNCH

Session 5: Lessons from Large Surveys

- 14:00 - 14:45 Michael Rogers Blanton (K)
What have we learned from the interpretation of large spectral surveys?
- 14:45 - 15:00 Anna Gallazzi
Ecology of galaxy stellar populations from optical spectroscopic surveys
- 15:00 - 15:15 Carlos Lopez-Sanjuan
The evolution of passive galaxies since $z = 1$: major mergers vs secular processes
- 15:15 - 15:30 Yanchun Liang
The properties of a large sample of low surface brightness galaxies from SDSS
- 15:30 - 16:00 COFFEE
- 16:00 - 16:30 Robert C. Kennicutt, Jr. (I)
Insights from Multiwavelength Surveys and IFU Spectroscopy
- 16:30 - 16:45 Warrick John Couch
Spatial mapping of the stellar populations and kinematics in E+A galaxies
- 16:45 - 17:00 Thijs van der Hulst
HI in void galaxies: probing the lowest density environments
- 17:00 - 17:15 Vivienne Wild
Building the red sequence through gas rich major mergers
- 17:15 - 17:30 Jeff Cooke
The detection of $z \sim 2$ type II supernovae in the CFHT legacy survey

Friday 07

Session 6: Galaxy Formation

- 09:00 - 09:45 Patricia Beatriz Tissera (K)
Current status of galaxy formation modelling
- 09:45 - 10:00 Nelson Padilla
Thousands of milky ways
- 10:00 - 10:15 Edward N. Taylor
The rise of massive red galaxies
- 10:15 - 10:30 Vladimir Avila-Reese
The evolution of galaxy disks in the LambdaCDM hierarchical scenario: models vs observations
- 10:30 - 11:00 COFFEE
- 11:00 - 11:30 Julien E. G. Devriendt (I)
Modelling high-redshift galaxies: what can we learn from high and ultra-high resolution hydro dynamical simulations?
- 11:30 - 11:45 Christopher C Hayward
Testing star formation rate indicators using galaxy merger simulations and radiative transfer
- 11:45 - 12:00 Thiago Signorini Goncalves
Quenching star formation in the green valley: the mass flux at intermediate redshifts

- 12:00 - 12:15 Tom Shanks
Extending PLE galaxy evolution models to Spitzer and sub-mm wavelengths
- 12:15 - 12:30 Basilio Xavier Santiago
The dark energy survey: perspectives for resolved stellar population studies
- 12:30 - 14:00 LUNCH

Session 7: The Next Decade

- 14:00 - 14:45 Roberto Abraham (K)
A golden decade for stellar populations?
- 14:45 - 15:00 Matthew Colless
Stellar populations and the fundamental plane from the 6dF galaxy survey
- 15:00 - 15:15 Andrew Bunker
Stellar populations at redshifts beyond 6
- 15:15 - 15:30 Anne Pellerin
The shining future of UV spectral synthesis
- 15:30 - 16:00 COFFEE
- 16:00 - 16:15 Dante Minniti
VISTA variable survey in the Milky Way
- 16:15 - 16:30 Myung Gyoon Lee
SMART for the next decade
- 16:30 - 16:45 Xu Kong
Spectral synthesis for the LAMOST galaxy survey
- 16:45 - 17:00 Chris Evans
E-ELT spectroscopy of resolved stellar populations beyond the local group
- 17:00 - 17:30 TBA
Concluding Remarks

POSTERS

Stars:

- Affer, Laura
Analysis of rotation of CoRoT dwarf stars
- Baella, Nobar Octavio
Symbiotic Stars and Planetary Nebulae in the [OIII]5007/HBeta vs.[OIII]4363/HGamma Diagnostic Diagram
- Cesetti, Mary
High-resolution near-infrared spectra of metal poor red supergiants

- Cortes, Cristian
Stellar parameters for 100 stars of the CoRoT exo—field
- Ducati, Jorge Ricardo
The Mass Ratio in Spectroscopic Binaries
- Dumitrescu, Alexandru
Comparative studies of some ellipsoidal variable stars observed by Hipparchos space mission
- Golovin, Alex
NQ Her: Binary or Single?
- Grundstrom, Erika D.
Spectroscopic H α and H γ Survey of Field Be Stars: 2004-2008
- Hojaev, A. S.
Conditions For Star Formation in Taurus Dark Clouds Complex
- Kalomeni, Belinda
The Polars
- Kehrig, C.
A Hot Molecular Core associated with the Ultracompact HII region G12.21-0.10
- Kehrig, Carolina
An integral field view of the massive star feedback and the ionized gas in HII galaxies
- Kniazev, Alexei
Spectroscopy of Emission-Line Objects in NGC 6822: Probing Stellar Populations and Evolution
- Lacour, Sylvestre
Spectro Interferometric Imaging of T Lep
- Malkov, Oleg Yu.
Parameterization of single and binary stars
- Mateluna, Renee
Detailed abundances for field stars surrounding the LMC cluster Hodge 11
- Mennickent, Ronald
A study of the interacting binary Double Periodic Variable V 393 Sco: evidence for mass loss and circumprimary disc
- Peng, Ting-Hung
Near infrared colours of main sequence stars in 2MASS

Placco, Vinicius M.

Abundance Patterns among Very Metal-Poor Stars in the Halo of the Galaxy: A Statistical Approach

Qian, Shengbang

Mass transfer and angular momentum loss in cataclysmic variables deduced by orbital period changes

Rossi, Silvia

A spectroscopic survey of FHB stars near the south galactic pole

Ruppert, Jan

Star Formation in the LMC: Young Stellar Population in two distinct Giant Molecular Clouds

Tautvaisiene, Grazina

CNO abundance pattern in the red clump stars of the Milky Way

Valls-Gabaud, David

The duty cycle of massive star formation at low redshift

Vanbeveren, Dany

The formation and evolution of massive and very massive stars in clusters

Zhu, Liying

Mass transfer in Near-Contact Binaries (NCB)

Star Clusters:

Alamo-Martinez, Karla Adriana

Testing how far we can measure globular clusters via Surface Brightness Fluctuations with HST

Colucci, Janet E.

Detailed Chemical Abundances of Extragalactic Globular Clusters Using High Resolution Spectroscopy

Dias, Bruno

Age and metallicity of stellar clusters in the Small Magellanic Cloud from integrated spectroscopy

Loubser, Ilani

Stellar populations in brightest cluster galaxies

Sakhibov, Firuz

Simulations of methods of comparison of multicolour photometry data with a grid of evolution models of star clusters

Dwarf Galaxies:

Amaral Lanfranchi, Gustavo

Stellar metallicity distributions in local dwarf spheroidal galaxies - a comparison between model and observations

Chilingarian, Igor V

Kinematically and Evolutionary Decoupled Structures in Dwarf Elliptical Galaxies

Gullieuszik, Marco

A near-infrared view of AGB stars in nearby dwarf galaxies

Held, Enrico V.

The Star Formation History of the Fornax Dwarf Spheroidal Galaxy

Koleva, Mina

Spatially resolved star formation histories of dwarf elliptical galaxies

Galaxies:

Bakos, Judit

Probing the origin of the stellar populations in the outskirts of late-type spiral galaxies: a panchromatic perspective

Busso, Giorgia

The UV spectrum of the Galactic Bulge

Cesetti, Mary

Early-type galaxies in the near-infrared: 1.5-2.4 micron spectroscopy

Chen, Xiaoyan

Stellar populations of the local infrared-selected galaxies

Chies-Santos, Ana L.

Globular clusters in early-type galaxies: K-band observations

Choi, Yumi

Star-forming Early-type Galaxies Seen with GALEX - Their Connection to E+A Galaxies

Costa Duarte, Marcus Vinicius
